**ASSURANCE STATEMENTS**

- 1) Professionally acceptable standards governing the care, treatment, and use of animals, including appropriate use of anesthetic, analgesic, and tranquilizing drugs, prior to, during, and following actual rese teaching, testing, surgery, or experimentation were followed by this research facility.
- 2) Each principal investigator has considered alternatives to painful procedures.
- 3) This facility is adhering to the standards and regulations under the Act, and it has required that exceptions to the standards and regulations be specified and explained by the principal investigator and ap Institutional Animal Care and Use Committee (IACUC). **A summary of all such exceptions is attached to this annual report.** In addition to identifying the IACUC-approved exceptions, this summary inc brief explanation of the exceptions, as well as the species and number of animals affected.
- 4) The attending veterinarian for this research facility has appropriate authority to ensure the provision of adequate veterinary care and to oversee the adequacy of other aspects of animal care and use.

## **IACUC Approved Exceptions to USDA Regulations or Standards (2007)**

- 1. Controlled food or water intake (i.e., feeding less than once a day and/or watering less than twice a day for an hour each time).**

Seventeen non-human primates were on studies using controlled water intake. The animals received ad-libitum water and/or juice during the experimental sessions as behavioral reinforcement for executing the required tasks. The maximum continuous period of controlled water intake was six days, with unlimited access to water for at least 24 hours between controlled periods.

- 2. Maintaining animals at temperatures and/or humidities outside the ranges specified by the standards.**

N/A

- 3. Not cleaning and/or sanitizing at required frequencies.**

N/A

- 4. Not providing diurnal lighting as required.**

Twelve tree shrews were maintained for up to 10 days in the dark to study dark-induced myopia. Daily care and monitoring occurred using night vision goggles following the same procedures as for the animals on diurnal schedules.

- 5. Not meeting space requirements (including innovative enclosures).**

N/A

- 6. Exceptions from the exercise plan for dogs or exceptions from the psychological well-being plan for primates.**

All non-human primates were socially housed unless research parameters, health status or behavior required individual housing. Individually housed animals received environmental enrichment through food treats, access to puzzles and/or toys, interaction with caretakers, and the ability to see, smell, and hear other animals of their species.
